Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. *Anticipations of the Reaction of Mechanical and Scientific Progress upon Human Life and Thought*, generally known as *Anticipations*, was written by H.G. Wells at the age of 34. He later called the book, which became a bestseller, the keystone to the main arch of my work. His most recent biographer, however, calls the volume both the starting point and the lowest point in Wells's career as a social thinker. Taking the revolution in transport facilitated by the mechanical revolution as his point of departure, Wells told readers they were living through a reorganization of human society that would alter every dimension of life. An academic biographer has described the degree of accuracy of Wells's predictions as certainly phenomenal.
