

The Enlightened Gene: Biology, Buddhism, and the Convergence that Explains the World (Hardback)

By Arri Eisen

University Press of New England, United States, 2017. Hardback. Condition: New. Language: English . Brand New Book. Eight years ago, in an unprecedented intellectual endeavor, the Dalai Lama invited Emory University to integrate modern science into the education of the thousands of Tibetan Buddhist monks and nuns in exile in India. This project, the Emory Tibet Science Initiative, became the first major change in the monastic curriculum in six centuries. Eight years in, the results are transformative. The singular backdrop of teaching science to Tibetan Buddhist monks and nuns offered provocative insights into how science and religion can work together to enrich each other, as well as to shed light on life and what it means to be a thinking, biological human. In *The Enlightened Gene*, Emory University Professor Dr. Arri Eisen, together with monk Geshe Yungdrung Konchok explore the striking ways in which the integration of Buddhism with cutting-edge discoveries in the biological sciences can change our understanding of life and how we live it. What this book discovers along the way will fundamentally change the way you think. Are humans inherently good? Where does compassion come from? Is death essential for life? Is experience inherited? These questions have...
