Plausible Deniability is a spellbinding account of a clandestine plot by Israeli government officials to circumvent a perceived threat to Israel's survival by implementation of the policies of America's first Black President. The conspirators smuggle a nuclear bomb into the United States with the intent of detonating the device in New York City and assign responsibility for the devastation to Islamic terrorists thereby influencing U.S. public opinion against the President's Middle East strategy and regain popular support for Israel's existence. The plotters dispatch two covert Mossad agents to the U.S. with the two sections of the nuclear apparatus. The undercover emissaries plan to reunite in New York, reassemble the device and set a delayed timer to explode the bomb once the saboteurs have safely escaped. NY Police Detective Brad Savage uncovers the plot and begins an investigation, eventually tracking down and killing one of the Israeli agents without discovering the weapon.
