AEI Press, United States, 2009. Paperback. Condition: New. New.. Language: English . Brand New Book. America faces a desperate organ shortage. Today, more than 78,000 people are waiting for a kidney transplant; only one in four will receive one this year, while twelve die each day waiting for help. Not surprisingly, many patients are driven to desperate measures to circumvent the eight-year waiting listrenting billboards, advertising in newsletters, or even purchasing an organ on the global black market. Altruism is an admirable but clearly insufficient motivation for would-be donors. What can be done to solve the kidney crisis? Reward organ donors for their remarkable gifts. Noncash benefits to people who donate to a desperate stranger will motivate others to do the same, increase the national supply of kidneys, and reduce needless death and suffering. When Altruism Isn t Enough: The Case for Compensating Kidney Donors explores the key ethical, theoretical, and practical concerns of a government-regulated donor compensation program. It is the first book to describe how such a system could be designed to be ethically permissible, economically justifiable, and pragmatically achievable. Altruism is a beautiful virtue, but relying on it as the sole impetus for organ donation ensures that thousands of people will continue to die each year while waiting for kidney transplants.
