Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Sound and Rhythm The time and care so wisely given in primary schools to the teaching of singing suggest that in them should be taught also the beautiful mechanism of sound and hearing, and for this another reason can be found. During the Boer War it was said that our young soldiers, when separated from their officers, showed at times a lack of intelligent initiative. This may have been in part due to the too literary character of their education. Be that as it may, all will agree that children should be taught to observe and think for themselves. The phenomena of sound afford a good means of doing this. The objection that no time can be found may be met by proposing that analysis and parsing should give way. More trouble is caused in the world by bad physiology than by bad grammar. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
