NOAA S OBSERVING SYSTEMS, ADDITIONAL STEPS NEEDED TO ACHIEVE AN INTEGRATED, COST-EFFECTIVE PORTFOLIO: REPORT TO CONGRESSIONAL COMMITTEES. (PAPERBACK)

Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. NOAA operates and maintains a portfolio of observing systems to capture the environmental data needed to achieve its diverse missions. Some of these systems focus on the oceans, coasts, and Great Lakes. An observing system is a collection of one or more sensing elements that measures specific environmental conditions and resides on fixed or mobile platforms, such as buoys or satellites. The House Appropriations Committee fiscal year report for the Department of Commerce s 2013 appropriations bill mandated GAO to review NOAA s ocean and coastal data collection systems. This report (1) identifies and describes the ocean, coastal, and Great Lakes observing systems NOAA operates; (2) identifies the annual operations and maintenance costs of these systems for fiscal years 2012 through 2014; and (3) examines the extent to which NOAA has taken steps to integrate and improve the cost-effectiveness of its observing systems portfolio. GAO analyzed agency documentation on, among other things, the characteristics and management of NOAA s observing systems, reviewed cost data from fiscal year 2012 through 2014, and interviewed NOAA officials.
