Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Integrating the Choice of Product Configuration With Parameter Design Using the Powered Fruit Juicer example, in this work, we will show how experimental design can be used to evaluate complex architectural factors such as different design solutions for head shape, or various technologies such as two systems of head rotation, and how these choices affect final performance. Including system design in the experimental optimization, this approach moves the development process naturally toward greater integration. The structure of this paper reflects the temporal differentiation in the underlying methodology between the a priori stage, in which the product framework and the experiment pattern are defined and the a posteriori stage in which, after experimentation, analysis and feedback is conducted to complete the development cycle. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
